SLEEPING BAG BUYING GUIDE

WHAT'S THE BEST SLEEPING BAG FOR YOUR ADVENTURE?

CAMPING: Camping sleeping bags are bigger and bulkier than others because they're well insulated for comfort in the outdoors. They're generally insulated with down or a synthetic alternative, which is great for milder temperatures.

You might choose this kind of sleeping bag for a family camping trip where you won't be carrying the sleeping bag too far on foot. A spacious option with thick filling and an elasticated hood is ideal for a camping trip.

HIKING: If you'll be walking longer distances and carrying a backpack with supplies, a tent and more, look for something lighter weight but also warm.

Tramping and hiking sleeping bags are usually narrower and filled with down. Planning a hiking trip? Choose a comfortable and compact option.

KIDS CAMO SLEEPING BAG

Suitable for: Indoor & Summer

Comfortable Temperature (guide only): 15 degrees

Size: 180cm (L) x 60cm (W)

Weight	Shell	Filling	Lining

CHOOSE THE IDEAL TEMPERATURE RATING:

Sleeping bags are often rated by the temperature at which they'll keep you comfortable, so it's important to consider when you'll use them and how high you need the rating to be.

The following ratings are common, with levels for temperature bands and seasons:

- Warm: Above 20°C
- Mild: Between 10 and 20°C
- Cold: Between 0 and 10°C
- Summer - over 10°C
- Summer, Autumn, and Spring - over 0°C
- All season - over -5°C
- Mountaineering and cold-weather - under -10°C

CHOOSING YOUR BAG SHAPE

Sleeping bags are offered in mummy, semi-rectangular and rectangular shapes.

Here's a bit of information about each type:

MUMMY-SHAPED:

These sleeping bags have more insulation and less volume so you'll warm up faster and stay warm.

SEMI-RECTANGULAR BAGS:

Semi-rectangular bags are tapered for warmth and heat retention, and will suit when you're camping in a range of temperatures and climates.

RECTANGULAR BAGS:

Make this choice for comfort and space when you're camping in Summer.

GET THE RIGHT FILL / INSULATION

You can also choose from different insulation weights to suit the climate you'll be camping in and what you'll be doing while you're there.

Sleeping bags with synthetic filling such as hollow and synthetic fibre are long lasting and quick to dry, but they're larger and heavier than down sleeping bags. They're an ideal choice if you're planning a family camping adventure.

Synthetic sleeping bags come in different gsm weights, so check this before you purchase.
